

AMENDMENTS TO THE CLAIMS

Listing Of Claims:

1. (Currently Amended) A method of creating a multiphase advertisement including a media component, the method comprising:
 - generating a first phase of the multiphase advertisement, the first phase including a first graphical interface having of a first dimension;
 - generating a second phase of the multiphase advertisement in which[[,]] ~~the second phase including a second~~ graphical interface has of a second dimension that is different from the first dimension of the first phase, in the second phase of the multiphase advertisement the second graphical interface includes of the second phase including a streaming media component space;
 - building a streaming media component using a software player engine in accordance with a predefined design of the multiphase advertisement's graphical interface by which, the player engine including at least a set of core media player variables and a set of core media player controls are predefined, the streaming media component including a link to streaming media content; and
 - incorporating the streaming media component into the streaming media component player space of the graphical interface in the second phase of the multiphase advertisement, so that the streaming media component is made available to experience the streaming media content in the second phase of the multiphase advertisement's graphical interface.
2. (Currently Amended) The method according to claim 1, wherein the content to be experienced via the streaming media component is streaming video.
3. (Currently Amended) The method according to claim 1, wherein the content to be experienced via the streaming media component is streaming audio.

4. (Original) The method according to claim 1, wherein the first graphical interface is an animated display.
5. (Original) The method according to claim 4, wherein the animated display of the first graphical interface uses vector-based animated graphics.
6. (Original) The method according to claim 1, wherein the first graphical interface of the first phase includes a toolbar, the toolbar including at least a link to trigger the second phase.
7. (Original) The method according to claim 6, wherein the link to trigger the second phase also launches the streaming media component.
8. (Original) The method according to claim 6, wherein the multiphase advertisement relates to a motion picture and wherein the toolbar includes at least a link to a trailer of the motion picture.
9. (Original) The method according to claim 6, wherein the multiphase advertisement relates to a motion picture and wherein the toolbar includes at least a link to still images of scenes from the motion picture.
10. (Original) The method according to claim 6, wherein the multiphase advertisement relates to a motion picture and wherein the toolbar includes at least a link to a streaming video of scenes from the motion picture.
11. (Original) The method according to claim 6, wherein the multiphase advertisement relates to a motion picture and wherein the toolbar includes at least a link to a streaming video of interviews of actors or actresses from the motion picture.
12. (Original) The method according to claim 6, wherein the multiphase advertisement relates to a motion picture and wherein the toolbar includes at least a link to an interactive interface for purchasing tickets to view the motion picture at a theater.

13. (Original) The method according to claim 6, wherein the toolbar includes at least a link to content about the subject of the multiphase advertisement.
14. (Original) The method according to claim 6, wherein the toolbar includes at least a link to an interactive form for contacting a second user about the subject of the multiphase advertisement.
15. (Original) The method according to claim 14, wherein the interactive form includes a field for inputting an electronic mail address of the second user.
16. (Original) The method according to claim 15, wherein, upon submission of the interactive form, an electronic mail is transmitted to the electronic mail address of the second user with information about the subject of the multiphase advertisement.
17. (Original) The method according to claim 1, wherein the set of media player variables includes a video size.
18. (Original) The method according to claim 1, wherein the set of media player variables includes a stream bandwidth.
19. (Original) The method according to claim 1, wherein the set of player controls includes a play control and a stop control.
20. (Original) The method according to claim 1, wherein the streaming media content is remotely stored on a streaming server, and wherein the streaming media component includes a stream identifier that is passed to the streaming server to retrieve the streaming media content.
21. (Currently Amended) A method for advertising, comprising:[::]

providing a first phase of a graphical interface including at least a first interactive component for triggering a second phase, the graphical interface first phase having a first dimension in the first phase;

providing a second phase of the graphical interface that is launched in response to interaction with the first interactive component, in the second phase the graphical interface having a second dimension that is different than the first dimension of the ~~first phase~~ graphical interface and a streaming media component space; and

providing at least one ~~second phase interactive~~ streaming media component integrated in the second phase graphical interface in the second phase, so that the streaming media component is made available to experience streaming media content in the second phase graphical interface.

22. (Original) The method in claim 21, wherein the first interactive component is a dynamic vector graphic.

23. (Original) The method in claim 21, wherein the first interactive component is an embedded streaming graphic.

24. (Original) The method in claim 21, wherein the first interactive component is hyperlink.

25. (Original) The method in claim 21, wherein the first interactive component is a button having a graphic.

26. (Original) The method of claim 21, wherein the first interactive component is a graphical toolbar including at least one hyperlink for triggering a second phase graphical interface of the multiphase advertisement.

27. (Canceled)

28. (Currently Amended) The method of claim ~~27~~ 21, wherein the streaming media component includes a link to is streaming video content.

29. (Currently Amended) The method of claim ~~27~~ 21, wherein the streaming media component includes a link to is a streaming audio content.
30. (Original) The method of claim 21, wherein the first phase graphical interface further comprises a graphical toolbar enabling a user to access additional advertisement information.
31. (Original) The method of claim 30, wherein the graphical toolbar includes one or more hyperlinks.
32. (Original) The method of claim 30, wherein the graphical toolbar includes one or more graphical buttons.
33. (Currently Amended) A system for creating a multiphase interactive graphical advertisement including an embedded streaming media component, the system comprising:
software permitting the generation of a first phase and a second phase of the multiphase graphical advertisement, the first phase having a first graphical dimension and the second phase having a second graphical dimension wherein the first graphical dimension and the second graphical dimension are different, the second phase including at least a streaming media component space for integration of a streaming media component; and
a player engine for incorporating the streaming media component into the streaming media component space of the second phase, the player engine including a core set of media player variables and a core set of media player controls for customizing the streaming media component, so that the streaming media component is made available to experience streaming media content in the second phase of the multiphase graphical advertisement.
34. (Currently Amended) A multiphase interactive advertisement, comprising:
a first phase of the multiphase interactive advertisement comprising having a first graphical interface;

a second phase of the multiphase interactive advertisement, in the second phase the
~~having a second~~ graphical interface including at least a streaming media
component space, and the second phase having a dimension that is different than a
dimension of the first phase; and
a streaming media component incorporated into the streaming media component space of
the second phase, so that the streaming media component is made available to
experience streaming media content in the second phase of the multiphase
advertisement's graphical interface;
wherein the second phase of the multiphase interactive advertisement is triggered by an
action performed on the first phase of the multiphase interactive advertisement.

35. (Original) The multiphase interactive advertisement of claim 34, wherein the first phase further includes a toolbar, the toolbar including one or more graphical buttons enabling a user of the multiphase interactive advertisement to interact with one or more features of the multiphase interactive advertisement.

36. (Original) The multiphase interactive advertisement of claim 35, wherein interaction with one of the graphical buttons provides further information about the subject of the multiphase interactive advertisement.

37. (Original) The multiphase interactive advertisement of claim 35, wherein interaction with one of the graphical buttons triggers the second phase.

38. (Original) The multiphase interactive advertisement of claim 35, wherein the action facilitates the user to purchase a product or service that is the subject of the multiphase interactive advertisement.

39. (Original) The multiphase interactive advertisement of claim 34, wherein the second phase is triggered by a mouse over of the first phase.

40. (Original) The multiphase interactive advertisement of claim 34, wherein the second phase is triggered by mouse click on an area of the first graphical interface of the first phase.
41. (Original) The multiphase interactive advertisement of claim 34, wherein the second phase is triggered by mouse clicking a graphical button on the first graphical interface of the first phase.
42. (Original) The multiphase interactive advertisement of claim 34, wherein the second phase is triggered by mouse clicking a hyperlink on the first graphical interface of the first phase.
43. (Currently Amended) A multiphase interactive advertisement incorporated into a web page, the multiphase interactive advertisement comprising:
- a first phase of the multiphase interactive advertisement, in the first phase having a first graphical interface that includes a vector-based graphical animation that runs in the multiphase interactive advertisement's graphical interface upon launch of the web page, the graphical interface having a first dimension in the first phase having a first dimension;
 - a second phase that is launched upon completion of the vector-based graphical animation of the first phase, in the second phase the multiphase interactive advertisement's having a second graphical interface has of a second dimension that is smaller than the first dimension of the first phase, and in the second phase the graphical interface includes including a toolbar for permitting a user to interact with the second phase of the multiphase interactive advertisement;
 - a third phase in which the multiphase interactive advertisement's having a third graphical interface includes including at least a streaming media component space, and in the third phase the graphical interface has having a dimension that is larger than the second dimension of the second phase; and
 - a streaming media component incorporated into the streaming media component space of the third phase, so that the streaming media component is made available to experience streaming media content in the third phase of the multiphase interactive advertisement's graphical interface;

wherein the third phase of the multiphase interactive advertisement is triggered by an action performed on the second phase of the multiphase interactive advertisement.

44. (Currently Amended) A multiphase interactive advertisement incorporated into a web page, the multiphase interactive advertisement comprising:

a first phase of the multiphase interactive advertisement which comprises having a first graphical interface that includes a graphical display visible upon launch of the web page, the graphical interface having a first dimension in the first phase ~~having a first dimension;~~

a second phase that is dynamically launched after a period of time, in the second phase the multiphase interactive advertisement's having a second graphical interface has of a second dimension that is smaller than the first dimension of the first phase, and in the second phase the graphical interface includes ~~including~~ a toolbar for permitting a user to interact with the second phase of the multiphase interactive advertisement;

a third phase in which the multiphase interactive advertisement's having a third graphical interface has, the third phase having a dimension that is larger than the second dimension of the second phase; and

wherein the third phase of the multiphase interactive advertisement is triggered by an action performed on the second phase of the multiphase interactive advertisement.

45. (Currently Amended) The multiphase advertisement of claim 44, wherein in the third phase the multiphase interactive advertisement's graphical interface includes at least a streaming media component space and wherein a streaming media component is incorporated into the streaming media component space of the third phase, so that the streaming media component is made available to experience streaming media content in the third phase of the multiphase interactive advertisement's graphical interface.

46. (Currently Amended) A computer-readable storage medium containing a set of instructions for a general purpose computer for development of a streaming media presentation, the instructions comprising:

- a core set of player controls for controlling the streaming media of the streaming media presentation;
- b a core set of player variables for customizing the streaming media of the streaming media presentation;
- c a vector-based graphical development application program accessible via to the computer to enable a user to specify a graphical interface design for a streaming media presentation prior to publication of the graphical interface, the core set of player controls and player variables operative with the vector-based graphical development application program to:
- enable a user to insert a selected set of player controls from the core set of player controls including at least a streaming media player display interface;
 - enable the user to set one or more of the player variables of the core set of player variables;
 - enable the user to select the streaming media using a stream identifier that identifies streaming media; and
 - enable the user to design other graphical features of the streaming media presentation;
- d) wherein, when the streaming media presentation's graphical interface is launched in accordance with the user-inserted set of player controls including at least a streaming media player display interface and the one or more player variables set by the user, the ~~computer passes the~~ stream identifier is passed to a backend streaming media content management system that locates and retrieves the associated streaming media and passes the streaming media to the streaming media player display interface so that the streaming media can be experienced in accordance with the user-specified design of the streaming media presentation's graphical interface.
